Greer of the Secret Service killed JFK, according to the Zapruder film allegation

The first recollection I have of this canard is hearing of it years ago from EdDeMar, who had moved to Arizona from Chicago. DeMar was connected with a man named Cooper who was selling a videocassette allegedly showing this based on the Zapruder film. Last year Gary Murr and I think a college professor, both from Canada, were here with the videocassette they made of it. They claim to see this clearly, as I do not even very unclearly.

This is typical of the flat-world solutions in that it ignores all the existing evidence, for example of the shots as reflected on the corpse, and the fact that with all those people looking on and with those in the limo to hear if not see it, not one said anything like it.

Not is there any support for it in the other films.

That Greer turned around was only his job, as was his reaction, if he braked the car.
